SUMMARY

Motivated IT professional with experience in software administration, security testing, and system implementation. Proven ability to support cross-functional teams, deliver technical training, and conduct in-depth testing to ensure system integrity. Seeking to leverage technical expertise and certifications to enhance organizational security.

WORK EXPERIENCE

System Engineer

CSI Technologies - Riyadh
Feb 2024 - Present

- Managed user accounts and access controls for Videntium software, troubleshooting issues and providing user training.
- Performed functionality and security testing across six platforms using Black Box and White Box methodologies.
- Identified vulnerabilities through manual testing and ensured compliance with cybersecurity standards.
- Documented findings and collaborated with developers to implement security improvements.

Software Solution Engineer

Art Of Consulting - Riyadh
June 2022 – Dec 2023

- Documented and managed contracts and transaction records, ensuring accuracy and secure handling of sensitive information.
- Conducted research and analysis to identify trends, applying insights to improve operational strategies.
- Organized and maintained databases, ensuring data integrity and accessibility for key stakeholders.
- Coordinated schedules and logistics, streamlining workflows to enhance operational efficiency.

Data Analyst

Mobishastra - Riyadh
Nov 2021 – Jun 2022

- Analyzed performance metrics and generated detailed reports, providing actionable insights to improve operational efficiency and identify potential risks.
- Monitored and evaluated data trends to support operational resilience and inform security-focused decisions for MRO processes.
- Presented data-driven recommendations to stakeholders, enabling informed decision-making and strategic planning to enhance both performance and security measures.
- Assisted in implementing data protection protocols, ensuring compliance with organizational and industry standards.
